

SUGARIN® | शुगरइन

Tylose

www.sugarin.shop

Sugarin Tylose is a perfect Carboxy Methy Cellulose (CMC) for converting rolling fondant into gum paste. Just add less than 1% of the rolling fondant weight gradually and keep kneading. Sugarin Tylose takes 10 to 15min to activate so add small amount and then wait for 10min, check and only if needed, add additional amount.
